

CHANNELS AND STUDS.

Humming PVC offers metal stud tracks made from high quality materials that are resistant to corrosion, ensuring that they remain functional for many years.

Features:

- **Strength:** Provides structural support for walls, ceilings, and partitions
- **Flexibility:** Allows for easy adjustments during installation
- **Compatibility:** Designed to work with corresponding metal studs and connectors
- **Corrosion Resistance:** Zinc coating ensures durability in humid or exterior applications.
- **Fire Resistance:** Some models are fire-rated to enhance safety.

Dimensions:

- Width: Typically ranges from **50mm** to **150mm**
- Depth: Varies from **25mm** to **100mm**
- Length: Standard lengths or custom cut to size

Material:

- Primary Material: Galvanized steel or other metals (aluminum, stainless steel)
- Coating: Zinc coating for corrosion resistance

Applications:

- Interior Walls: Used in drywall partitioning systems for residential and commercial buildings.
- Ceilings: Provides support for suspended ceilings
- Exterior Walls: Suitable for use in exterior curtain wall systems

Installation:

- Fastening: Installed using screws or fasteners designed for metal framing
- Alignment: Provides straight and level surfaces for attaching drywall or other cladding materials
- Cutting: Can be cut to desired lengths using metal shears or similar tools
